# REQUIREMENT FOR A LEADING ENGINEERING COMPANY, POLAND

## CV SELECTION

### MILLWRIGHT OR MECHANICAL TECHNICIAN

15

A talented and qualified millwright who has proven experience with industrial and construction equipment repairs. You will be responsible for dismantling machinery, transferring equipment, interpreting blueprints, and installing equipment.

The ideal candidate has in-depth knowledge of hydraulics, belt systems, motors, and other industrial machine mechanisms essential for job procedures. Must be a team player with strong attention to detail. In this position, you should also be able to make decisions, troubleshoot, and perform repairs with little to no supervision.

#### Minimum Qualifications /Required Characteristics:

High school diploma or equivalent qualification.

A minimum of 3 years' experience as a millwright or similar job.

In-depth knowledge of construction equipment and machinery.

Completion of an accredited millwright certificate program.

Good communication skills.

Strong attention to detail with excellent mathematical skills.

Must be able to work well in a team environment.

#### RESPONSIBILITIES:

Disassemble and reassemble equipment for repair or transportation.

Build the foundation for machines.

Construct and install equipment such as shafting, conveyors and tram rails.

Review and interpret engineering specifications, schematics, and blueprints to determine work procedures.

Transfer equipment to the applicable site for maintenance to avoid contamination or safety hazards.

Grind and file machinery parts.

Supervise construction workers when using the equipment.

Work with a range of hand tools including measuring tools, welding and brazing equipment.

Determine which machines, techniques, and tools to use when moving equipment and completing jobs.

Visit various construction sites.

Food, Accommodation & Transportation provided by the company

# REQUIREMENT FOR A LEADING ENGINEERING COMPANY, POLAND

## CV SELECTION

### MECHANICAL FOREMAN

17

Has responsibility for assisting with the development of reliability-based maintenance strategy, based on preventive and predictive maintenance for the product line equipment. Work directly with the Maintenance Manager to build a reliable system and maintenance team. Works with Repair and Maintenance Technicians to schedule workload. Primarily activity is at workshop, troubleshooting, repairing, refurbishing, implementing mandatory modifications and executing and/or planning preventive and corrective maintenance of field equipment and tools, helping to mitigate assets related non-productive time and improve overall field service delivery performance. He/she may be required to attend a client location to perform his/her duties whenever an R&M task is deemed necessary to carry over a field operation.

#### DUTIES & RESPONSIBILITIES:

Produce and Maintain an efficient system for the tracking of Equipment Usage, Inventory Control and Equipment Upgrades required or planned

Ensure all current operating contracts are supported, and that the chain of support for any equipment/software problems they may encounter is in place and being implemented.

Supply, in accordance with company reporting systems, monthly reports allowing efficient communication and accurate information pertaining to Inventory, purchases and equipment supply.

Communicate effectively with both field operations and the regional service Supervisor through regular meetings / emails / telephone conversations, updating procedures and releasing information in a timely manner.

Research / Development and Assist with technical feedback from trials of new techniques and activities in order to increase the local market and stay ahead of competition.

Perform maintenance and or troubleshoot while in the field, communicate any needs resulting from these activities through the respective channels to the Local and Region Offices as required.

Organizes all Technician Team Members daily roles and duties as per location demands

Supervises the work of all technicians on the R&M service team, including processes, procedures, paperwork accuracy, safety, etc.

Reports inventory and asset issues to R&M Supervisor

Supply the Regional Technical Support with all necessary operational reports including Failure / Non-Conformance Reports, Inventory checks, and Engineer Visit status reports.

Ensure all necessary documents are distributed for the optimum communication of Equipment

Operating Procedures to local management and field crews. These may be in the form of Manuals, Checklists, Procedures etc

Verify local field personnel competence levels with respect to equipment operation and maintenance, recommend training, and ensure performance evaluations of employees.

Identify and report potential personnel problems and system anomalies.

Assist in updating training records, experience etc. Coordinate with the Regional Technical Support Supervisor.

Ensure the highest standard of quality assurance is applied for installation and service of equipment. Ensure these standards are maintained through all aspects of the operation, from refurbishment and restocking through to routine maintenance and repair

Know and understand Weatherford Quality Policy and comply with all requirements of the Quality Systems Manual, Operating and Technical Procedures and Workplace Instructions

#### Qualifications

Minimally 8-10+ years related experience

High School diploma (or Secondary School Diploma or equivalent) as minimum.

Preferred 4 years College degree/diploma in Mechanical

Food, Accommodation & Transportation provided by the company
