PROJECT ENGINEER JOB OPPORTUNITIES FOR KINGDOM OF SAUDI ARABIA

Our client is one of the world's largest fully integrated energy enterprises & one of biggest Oil and Gas Exploration & Production, Refining & Distribution Company in Saudi Arabia. It has domestic and international joint and equity ventures in refining and marketing. The professional rewards are amazing, but so too are the lifestyle and benefits. They can offer professionals from diverse backgrounds and specialties & build a solid, secure future – not to mention extensive international exposure and the opportunity to see your ideas become reality. Work at the forefront of the industry and see how your career evolves with invested time and effort. It's a chance to make a huge impact both on the local economy and on a global scale. They now urgently seek to hire the below professionals:

Project Engineer - Mechanical JRE25156

- Bachelor's degree in Engineering from a recognized university; a higher degree is preferred. Ideally a Professional Registered Engineer.
- Min. 7 years of related experience, preferably in the oil industry or similar process industry working in the engineering design and construction phase of projects.
- Should have experience in the support of both small and large scale capital projects.
- Familiar with International Engineering Codes and Standards.
- Excellent English communication skills (verbal and written).
- Dynamic attitude towards project improvements and savings.
- PMP Certification is desirable but not mandatory.
- Work experience in the GCC, Saudi Arabia, or Saudi Aramco is a plus.

Sr. Project Manager (Process Eng) Ammonia JRE25310

- B.S. in Engineering and a higher degree is preferred.
- Minimum twenty (20) years of experience in the project management field related to refining and petrochemical industries with a specialty in Ammonia, such that the incumbent is clearly recognized as an expert in this field.
- PROJECT MANAGER EXPERIENCE: Seven (7) years of experience as a project manager of projects in design, construction, pre-commissioning, commissioning, startup, and operation with values ranging from \$100MM to \$500MM.
- Excellent English communication skills (verbal and written) and no second language is required.

Sr. Project Manager (Process Eng) Petrochem JRE25296

- B.S. in Engineering and a higher degree is preferred.
- Overall experience twenty (20) years of experience in the project management field related to refining and petrochemical industries with a specialty in Petrochemicals, such that the incumbent is clearly recognized as an expert in this field.
- Seven (7) years of experience as a project manager of projects in design, construction, pre-commissioning, commissioning, startup, and operation with values ranging from \$100MM to \$500MM.
- Excellent English communication skills (verbal and written) and no second language is required.

Project Engineer - Civil JRE25319

- B.S. in Engineering and a higher degree is preferred.
- Minimum 9 years of related experience, preferably in the oil industry or similar process industry working in the engineering design and construction phase of projects.
- Conducts special studies and performs engineering analysis, development, design, coordinate and control of assigned projects within any one of the recognized engineering fields. Job requires that incumbents have training, knowledge and ability in his engineering specialty, a working knowledge of related engineering fields, applicable codes and standards.

Project Engineer - Electrical JRE25294

- B.S. in Engineering and a higher degree is preferred.

Process Engineer Petrochemicals JRE25266

- B.S. in Engineering and a higher degree is preferred.
- Overall Experience twenty (15) years of experience in the project management field related to refining and petrochemical industries with a specialty in Petrochemicals, such that the incumbent is clearly recognized as an expert in this field.
- SENIOR PROJECT ENGINEER EXPERIENCE: Seven (7) years of experience as a Senior Project Engineer of projects in design, construction, pre-commissioning, commissioning, startup, and operation with values ranging from \$100MM to \$500MM.
- Excellent English communication skills (verbal and written) and no second language is required.

Project Material Specialist JRE25155

- Bachelor of Arts Business & Management OR Bachelor of Science Industrial Technology An advanced degree is preferred.
- Minimum 7 experience in Material Specialist activities, including at least 7 in project design, contract administration and inventory management & control.

Project Manager Ammonia (Process Eng.) JRE25133

- B.S. in Engineering and a higher degree is preferred.
- Minimum Twenty (20) years of experience in the project management field related to refining and petrochemical industries with a specialty in

Ammonia, such that the incumbent is clearly recognized as an expert in this field.

- Seven (7) years of experience as a project manager of projects in design, construction, pre-commissioning, commissioning, startup, and operation with values ranging from \$100MM to \$500MM.
- Excellent English communication skills (verbal and written) and no second language is required.

Project Engineer - Mechanical JRE25131

- Bachelor's degree in Engineering from a recognized university; a higher degree is preferred. Ideally a Professional Registered Engineer.
- Minimum 7 years of related experience, preferably in the oil industry or similar process industry working in the engineering design and construction phase of projects.
- Experience in the support of both small- and large-scale capital projects. Familiar with International Engineering Codes and Standards.
- Excellent English communication skills (verbal and written).
- Dynamic attitude towards project improvements and savings.
- PMP Certification is desirable but not mandatory.
- Work experience in the GCC, Saudi Arabia, or Saudi Aramco is a plus.
- Familiarity with Saudi Aramco standards preferred.
- Must have a thorough knowledge of best engineering practices, solid industry codes and standards background (ASME, API, NACE, ASTM, ISO) and use of engineering software.

Project Engineer - Structural JRE25128

- Bachelor's degree in Civil Engineering from a recognized university; a higher degree is preferred. Ideally a Professional Registered or Chartered Engineer.
- Minimum of 12 years of related experience in the oil/gas industry working as a civil engineer. Your experience will include working on the engineering design and construction phases of projects.
- Familiar with International Engineering Codes and Standards.
- Excellent English communication skills both verbal and written.
- PMP certification is desirable but not mandatory.
- Knowledge of the international standards and codes AISC, ACI and API is essential. API-938 is preferred.

Project Engineer - Quality Engg JRE25127

- Bachelor's of Science degree or Bachelor of Engineering degree, or equivalent, from a recognized and approved program.
- Minimum of fifteen (15) years of experience in engineering and construction, including at least ten (10) years relevant experience in a quality assurance role in the oil and gas industry or related process industries. A minimum of five (5) years working in project management or within an engineering design contractor organization is preferred, with understanding in both preliminary and detailed engineering, construction and commissioning from a quality control or quality assurance perspective.
- Certification such as Quality Manager, Lead Quality Auditor, Six Sigma, or Quality Improvement Team Leader;
- You will be an ISO 9001:2015 certified Lead Auditor or similar, demonstrating seasoned capability as a Lead Auditor;
- Knowledgeable in Quality Assurance terms, tools, and methodologies;
- Good written and verbal communication skills is a requirement;
- Good leadership, teamwork and interpersonal skills is necessary;
- An understanding of the implementation of corrective action programs is expected.

Project Engineer - Mechanical JRE25125

- B.S. in Mechanical Engineering and a higher degree is preferred.
- Overall Experience Fifteen (15) years of experience in the refining and the petrochemical industries with a specialty in fired heaters and related equipment, such that the incumbent is clearly recognized as an expert in this field.
- Minimum Five (5) years of field experience including construction, pre-commissioning, commissioning, startup, and operation.
- Excellent English communication skills (verbal and written) and no second language is required.
- Must have Engineering Design & Construction phase experience with a thorough knowledge of engineering practices and economic principles in the applicable International Codes, Standards and Specifications.
- Dynamic attitude towards project improvements and savings. PMP Certification is desirable but not mandatory.
- Flexible to work in multinational teams and mobilize to different locations including remote areas as needed.

Project Engineer - Mechanical Static JRE25123

- B.S. in Mechanical Engineering and a higher degree is preferred.
- Overall Experience Fifteen (15) years of experience in the refining and the petrochemical industries with a specialty in static equipment, such that the incumbent is clearly recognized as an expert in this field.
- Minimum Five (5) years of field experience including construction, pre-commissioning, commissioning, startup, and operation.

- Excellent English communication skills (verbal and written) and no second language is required.

- Must have Engineering Design & Construction phase experience with a thorough knowledge of engineering practices and economic principles in the applicable International Codes, Standards and Specifications.
- Dynamic attitude towards project improvements and savings. PMP Certification is desirable but not mandatory.

- Flexible to work in multinational teams and mobilize to different locations including remote areas as needed.

Project Engineer - Mechanical Rotating JRE25122

- B.S. in mechanical Engineering and a higher degree is preferred.
- Overall Experience Fifteen (15) years of experience in the refining and the petrochemical industries with a specialty in mechanical/rotating equipment, such that the incumbent is clearly recognized as an expert in this field.
- Minimum Five (5) years of field experience including construction, pre-commissioning, commissioning, startup, and operation.
- Excellent English communication skills (verbal and written) and no second language is required.
- Must have Engineering Design & Construction phase experience with a thorough knowledge of engineering practices and economic principles in the applicable International Codes, Standards and Specifications.
- Dynamic attitude towards project improvements and savings. PMP Certification is desirable but not mandatory.
- Flexible to work in multinational teams and mobilize to different locations including remote areas as needed.

Project Engineer - Instrumentation JRE25120

- B.S. in Electrical/Electronics/Instrumentation Engineering and a higher degree is preferred.
- Overall Experience Fifteen (15) years of experience in the refining and the petrochemical industries with a specialty in Instrumentation & Process Control, such that the incumbent is clearly recognized as an expert in this field.
- Minimum Five (5) years of field experience including construction, pre-commissioning, commissioning, startup, and operation.
- Excellent English communication skills (verbal and written) and no second language is required.
- Must have Engineering Design & Construction phase experience with a thorough knowledge of engineering practices and economic principles in the applicable International Codes, Standards and Specifications. Expertise in specific control & instrumentation disciplines such as Advanced process control (APC), Distributed control systems (DCS), Programmable logic controllers (PLC), Supervisory control and data acquisition (SCADA), Emergency shutdown system (ESD) & etc.
- Dynamic attitude towards project improvements and savings. PMP Certification is desirable but not mandatory.
- Flexible to work in multinational teams and mobilize to different locations including remote areas as needed.

Resource Planning Specialist JRE25117

- Bachelor's degree in Engineering or Construction Management with a
- Minimum of 15 to 20 years of experience in project planning, including at least 4 to 6 years specifically performing the development of manpower forecast requirements in terms of specialty and disciplines for mega / capital project in different industries such as Oil & Gas, Hydrocarbon, Refinery, Offshore, and Infrastructure. Preferably Certified from Professional Organization. Experience in Human Resources would be an added advantage.

- Candidate should be capable to analyze all levels of project schedules, project resource requirements, productivity achieved, and has the ability to forecast remaining efforts required (per discipline) to complete timely the project, and to reflect outcome through updated Manpower Plan. Professional certification is desirable from PMI (PMP) and AACI (PSP).

Environmental Office JRE25115

- Bachelor's degree in Environmental Engineering from a recognized and approved program. An advanced degree is preferred.
- Minimum Ten years of experience in oil and gas, petrochemicals and construction, including at least five years in project-based positions.
- Experience of Environmental Impact Assessments
- Prepare, review and revise environmental recommendation reports and monitor the progress
- Extensive travel requirement to project sites
- Knowledge of analytical and scientific software, compliance software and graphic imaging
- Engineering or scientific related activities preferably associated with the production and processing of oil and construction.
- Ability to speak and write reports or articles in English using both scientifically correct terminology and terms understandable.
