ENGINEERING OPPORTUNITIES FOR QATAR

JERRY VARGHESE, urgently requires the following professionals for the Public Works Authority in Qatar who is responsible for Design, Construction and Operation of Highways, Drainage, Government Building and Infrastructure, for their **DRAINAGE MAINTENANCE & OPERATION AND ROAD MAINTENANCE & OPERATION DEPARTMENT**

SENIOR MECHANICAL ENGINEER JRE25935

- Bachelor's Degree in Civil or Electrical Engineering
- Up to 11 years of cumulative experience in a relevant field (Master's degree)
- Up to 12 years of cumulative experience in a relevant field (Bachelor's degree)
- Responsible to inspect the on-going maintenance activities and services delivered by the Primary Framework Contractor relating to DNDM Mechanical components in the assigned catchment zone in a timely accurate manner.
- Plan and program repair works on the pumping station / Treatment Plants mechanical components
- Monitor outsource agencies work schedules, set priorities and ensure the appropriate assignment of equipment, materials, and personnel.
- Carry out design and material reviews to ensure compliance with relevant standards, project specifications and DNDM requirements.
- Monitor Framework Contractors service delivery to ensure works quality, in line with the service level agreements, contractual specifications and key performance indicators.

CIVIL ENGINEER ADVISOR JRE25934

- Bachelor's Degree in Civil Engineering
- Up to 20 years of cumulative experience in a relevant field (Master's degree)
- Up to 30 years of cumulative experience in a relevant field (Bachelor's degree)
- Must have demonstrated experience in the planning, design and construction phases of small, medium, and large scale infrastructure projects
- Experience includes water and wastewater facilities, wastewater collection systems, water transmission / distribution projects, reclaimed water plant studies, pipeline rehabilitation projects, pump stations, and reservoirs
- Demonstrate creative, foresight and mature engineering judgment in anticipating and solving engineering problems.
- Ability to communicate effectively with clients and project team
- Ability to effectively prepare memorandums, reports and other written deliverables

SENIOR CIVIL ENGINEER JRE25933

- Bachelor's Degree in Civil or Electrical Engineering
- Up to 11 years of cumulative experience in a relevant field (Master's degree)
- Up to 12 years of cumulative experience in a relevant field (Bachelor's degree)
- The Senior Civil Engineer is responsible for the management of outsourced maintenance / clearing and upgradation activities related to Civil elements of all drainage systems in the assigned catchment zone to ensure that availability of assets is at an agreed level to enhance customer and stakeholder satisfaction while achieving Strategic Objectives.
- The role manages the on-going maintenance activities and services delivered by the Framework Contractor as per agreed SLAs thereby ensuring system reliability across the drainage asset base in the catchment.
- Manage the Framework Contractor's maintenance / clearing activities and RRRU works related to all those systems (Foul Water / SGW / TW) to ensure the availability / maintainability / reliability of all DNDM (Foul Sewer / SGW/TW) assets in the assigned catchment zone.

SENIOR HIGHWAY ROAD ENGINEER JRE25932

- Bachelor's degree in Civil Engineering
- Up to 11 years of cumulative experience in a relevant field (Master's degree)
- Up to 12 years of cumulative experience in a relevant field (Bachelor's degree)
- The Senior Highway Road Engineer is responsible for the management of outsourced maintenance activities of Highway structures in Qatar to ensure the delivery of requested services within the agreed KPI / SLA in a timely accurate manner.
- Coordinate with outsource agencies related to Maintenance activities of Highway structures
- Monitor outsource agencies work schedules, set priorities and ensure the appropriate assignment of equipment, materials, and personnel.
- Manage the Primary Framework Contractor's (PFC's) O&M activities related to the provision of customer / stakeholder valued services provided via Maintenance activities of Highway structures in Qatar to ensure the delivery of services, within the agreed KPI / SLA framework.

- Merge team members to carry out necessary inspection and supervision activities to ensure the Framework Contractor's compliance with all contractual obligations.
- Provide technical expertise to Head of Section on programme of works carried out by Framework Contractors, to sustain and improve levels of service to local communities and other stakeholders.
- Review contract documents received from the Structures Team prior to submitting to Section Head for approval.
- Review inspection and assessment reports and design calculations that are prepared by the team or by the appointed consultant.
- Monitor and review the programme of works performed by Framework Contractors and cash spend for the Section.
- Ensure usage of existing and new processes, activities and tools/in place to manage the performance of Framework Contractors against agreed KPI / SLA.
- Responsible for the management of structures maintenance / strengthening projects ensuring they meet the programme, cost, and quality requirements of the contract.
- Ensure team / Framework Contractor's compliance with all processes and procedures relating to Enterprise Asset Management System (EAMS) and other RDM systems and processes. Identify and discontinue redundant / duplicate activities.

SENIOR ENVIRONMENT ENGINEER JRE25931

- Bachelor's Degree Environmental Science / Engineering, Sustainability, Environmental Planning & Design or Renewable Energy / Biochemistry studies
- Up to 11 years of cumulative experience in a relevant field (Master's degree)
- Up to 12 years of cumulative experience in a relevant field (Bachelor's degree)
- The Senior Environment Engineer is responsible for leading the development and implementation of the PWA / Assets Affairs carbon management plan, identifying and setting the standards for carbon reduction projects and initiatives, and focusing on greenhouse gas emissions modelling programs on energy and resource conservation that will reduce the impact of Assets Affairs and its supply chain on the environment
- In-depth knowledge about current environmental laws and regulations and potential regulatory changes
- Hands-on knowledge coordinating complex projects / regulatory action is also useful.
- It is also vital that they undertake initial and annual refresher training in hazardous waste management (RCRA), have an understanding of ISO 14001 and experience in auditing of requirements
- Evidence of relevant ongoing training with particular focus on energy and / or carbon management, legislation, and communication

ASSETS ENGINEER EXPERT JRE25930

- Bachelor's degree in civil engineering.
- Up to 10 years of cumulative experience in a relevant field (Master's degree)
- Up to 20 years of cumulative experience in a relevant field (Bachelor's degree)
- The Senior Asset Management Engineering Expert is responsible for the management of activities related to the delivery of long-term Asset Management (AM) strategy, standardized Asset Management Plans for Catchment Zones, Investments, policies and procedures across a diverse range of asset portfolios and Framework Contracts to align with the overall strategic objective of Assets Affairs
- Assist in the development of the Department's Annual Business Plan, as well as the Section's Performance Objectives and ensure the alignment of activities.
- Embed asset management related change due to Catchment Zone Framework, driving standardisation and process compliance.
- Develop Assets Affairs asset management policy, strategy, and standards to support Framework Contractors to develop AM Plans accordingly.

SR. MAINTENANCE ENGINEER EXPERT JRE25929

- Bachelor's degree in civil engineering.
- Up to 10 years of cumulative experience in a relevant field (Master's degree)
- Up to 20 years of cumulative experience in a relevant field (Bachelor's degree)
- The Senior Maintenance Engineering Expert is responsible for leading and directing team and the contractors working within a specified area / zone.
- The role will monitor the area operations, management and on-going maintenance activities and services provided and ensuring all commercial, quality and safety standards

- are adhered to, in a timely and accurate manner.
- Assist in the development of the Department's Annual Business Plan, as well as the Section's Performance Objectives and ensure the alignment of activities.
- Embed asset management related change due to Catchment Zone Framework, driving standardisation and process compliance.
- Develop Assets Affairs asset management policy, strategy and standards to support Framework Contractors to develop AM Plans accordingly.

CONSTRUCTION ENGINEER EXPERT JRE25928

- Bachelor's Degree in Civil Engineering or other construction-related area
- Up to 15 years of cumulative experience in a relevant field (Master's degree)
- Up to 20 years of cumulative experience in a relevant field (Bachelor's degree)
- The Construction Engineering Expert is responsible for the development and implementation of Building Information Modeling (BIM) and Digital Engineering execution plans, project setup, model production, coordination and help establish digital delivery specific workflows for collaborators, and data exchange
- Extensive experience in an AEC (Architects, Engineering and Construction) role
- Excellent IT skills
- Great verbal and written communication skills.
- Extensive knowledge of quality and document management processes.

ENVIRONMENTAL ENGINEER EXPERT JRE25927

- Bachelor's Degree Environmental Science / Engineering, Sustainability, Biology, or Chemistry or other physical or biological sciences
- Up to 10 years of cumulative experience in a relevant field (Master's degree)
- Up to 15 years of cumulative experience in a relevant field (Bachelor's degree)
- The environmental expert is responsible to support Assets Affairs' environmental health and sustainability efforts, by monitoring the impact of AA Operations on the environment, identifying environmental issues, and recommending solutions, in line with Assets Affairs' Corporate Environmental Policy
- In-depth knowledge about current environmental laws and regulations and potential regulatory changes
- A prior hands-on knowledge coordinating complex projects / regulatory action is also useful.
- It is also vital that they undertake initial and annual refresher training in hazardous waste management (RCRA), have an understanding of ISO 14001 and experience in auditing of requirements

ITS ENGINEERING EXPERT 1 JRE25925

- Bachelor's degree or higher-level qualifications in Engineering in a relevant subject.
- Professionally Chartered membership of relevant professional body (e.g. CEng, MICE, IMRtruct, or MCHIT)
- Minimum 20 years' experience in Roads / Highways operation and maintenance, ideally within the public sector
- The ITS Engineering Expert 1 is responsible to monitor and support the Road Management Systems (RMS) necessary to ensure secure and reliable 24/7 communications
- Knowledge and experience in International Quality Road works best practice and how it is delivered in an Organization preferred

SENIOR ROAD ENGINEER JRE25924

- Bachelor degree in Civil Engineering
